RESEARCH
INTERESTS

Speech signal processing and Machine Learning with focus on Acoustic modeling for robust speech recognition

EDUCATION

Whiting School of Engineering, Johns Hopkins University

Ph.D. Candidate, ECE (expected May 2016)

- Dissertation Topic: Learning distortion stable temporal sequence representations
- Advisor: Daniel Povey and Sanjeev Khudanpur

International Institute of Information Technology - Hyderabad

M.S. by Research, CS, May 2011

- Dissertation Topic: Synthesis of missing units in a Telugu text-to-speech system
- Advisor: Kishore Prahallad

Dhirubhai Ambani Inst. of Inf. and Comm. Technology (DAIICT)

B.Tech. in Information and Communication Technology, May 2007

- Topic: Note Histogram based hash function for Content Based Music Information Retrieval (CBMIR)
- Advisor: Vijaykumar Chakka

ACHIEVEMENTS

- Recipient of the Frederick Jelinek Fellowship 2015
- Winner of the IARPA ASpIRE far field recognition challenge, 2015
- Recipient of the best student paper award at Interspeech 2015

PUBLICATIONS

1. **Vijayaditya Peddinti**, Daniel Povey, Sanjeev Khudanpur, *A time delay neural network architecture for efficient modeling of long temporal contexts*, in Proceedings of INTERSPEECH 2015
   Best paper award

RESEARCH AND INDUSTRIAL EXPERIENCE	**Sep '14–Nov '14**	**Research Intern at Microsoft Research in Speech Recognition Group** Mentor : Mike Seltzer
	July '14–July '14	**Fred Jelinek Memorial Workshop, Prague** Member of the Speech team working on ASR error prediction in mismatch conditions
	May '13–Aug '13	**Research Intern at IBM T.J. Watson Research Center in Speech Transcription Technologies** Involved in the use of Deep Scattering Spectrum in acoustic modelling for speech recognition Mentor : Tara Sainath
	Aug '11–Present	**Research Assistant at Center for Language and Speech Processing, Johns Hopkins University.** *Robust Automatic Transcription of Speech (RATS):* Funded by DARPA Involved in the project on processing of noisy and degraded speech for speech activity detection, keyword spotting, language identification and speaker identification. Developed feature extraction techniques for noise robust acoustic modeling (published in ICASSP, 2013).

Zero Resource Speech Technologies and Models of Early Language Acquisition, Summer workshop CLSP
Developed speaker invariant features for keyword spotting in zero resource scenarios (published in ICASSP, 2013).

Jan '11–Jul '11   **Analytics Intern at I-Labs, [24]7 Inc.**
Involved in algorithm development for event detection in volume time series created from multiple data streams like microblogs (like Twitter), social networks (like Facebook) and Chats (from customer service centers).

Dec '08–Dec '10   **Research Assistant at IIIT-Hyd at the Speech and Vision Lab**
Indian Language TTS , Funded By Ministry of Commn. & Info. Tech., India (MCIT)
Involved in the development of a text-to-speech (TTS) synthesizer for Telugu. Developed an algorithm for automatic segmentation of audio databases (published in Interspeech, 2011) and designed a back-off strategy for missing units (published in ICASSP,2011), implementation syllable based synthesizer in the Festival framework.

Indian Language Data Collection , Funded by Lang. Data Consortium of Indian Languages (LDC-IL)
Worked on automatic generation of phonetic alignments of audio data with erroneous transcripts, for speech data in Telugu as part of project for the collection of speech data each in Telugu, Kannada and English languages.

Jul '07–Jul '08   **Technical Associate at Techmahindra Ltd.**

TEACHING EXPERIENCE

Spring 2013   Teaching Assistant, Speech and audio processing by humans and machines

Fall   2012,2013   Teaching Assistant, Processing of audio and visual signals

GRADUATE COURSEWORK

❑ Speech and audio processing by humans and machines
❑ Information Extraction
❑ Matrix Analysis
❑ Random Signal Analysis
❑ Machine Learning in Complex Domains

❑ Processing of audio and visual signals
❑ Wavelets and Filter Banks
❑ Computational Molecular Medicine (Techniques for Pattern Recognition in low data scenarios)
❑ Optimization

PROGRAMMING

Languages: Python, C++, shell script, MATLAB
Toolkits: KALDI, PyLearn2, Theano

RELEVANT SKILLS

Languages: English, Hindi, Telugu

REFERENCES   Will be provided on request.
